# Quick Start Guide

MobileShield[222] Pro

MobileShield[222] Pro

In The Box:

- 1 MobileShield[222] Pro
- 1 USB-C to USB-C Charging Cable (3 feet)
- 1 Color-Changing Far-UVC Disinfection Detection Card / Single-Use
- 1 Drawstring Carrying Bag
- 1 Microfiber Lens Cleaning Cloth

Before First Use:

- Remove the clear protective film from the top Far-UVC emitter window.
- Fully charge the device using the provided USB-C cable.
- Mount it on any metal surface if desired, using the built-in magnet.

Far-UVC Emitter

Proximity Sensor

On / Off

Battery Level

Powering On:

- Press the power button once. The LED will glow **green** for 3 seconds.
- Press the button a second time during those 3 seconds to turn on.
- The LED will turn **blue** when disinfection is active.

While In Use:

- The Far-UVC emitter gives off a faint blue glow.
- If something comes within 6 inches, the LED turns red and the emitter shuts off.
- Once area is clear, it automatically turns back on (LED glows **blue**).

Powering Off:

- Press the power button once. The device will fully shut down.

Low Power Mode:

- After 10 minutes off, the device enters power-saving mode.
- When turning it back on, the LED will blink **blue** for 10 seconds to calibrate. Then it starts disinfecting automatically.

Battery Status:

- Charge level is indicated by 4 battery-level LEDs below the emitter.
- A full charge provides 5 hours of use.
- Only use the included charging cable.
